EXPERIENCE

Good Inside, New York, NY - Senior Software Engineer, 2025 - 2026

Platform engineering for a premium learning and coaching service for parents.

- Designed and shipped a proactive follow-up system for an LLM chat product, capturing completion signals across a microservices stack via SQS and driving scheduled Braze push notifications through a durable, idempotent delivery pipeline.
- Shipped a CMS-to-vector-store ingestion pipeline over SQS and Pinecone, enabling published content to be immediately available for RAG-based AI coaching features.
- Built and packaged an internal feature-flag and experimentation library, adopted across backend microservices to standardize rollouts and give product teams consistent experiment configuration.

New York Mets, New York, NY - Senior Software Engineer, 2023 - 2025

Internal data platforms and tools powering a Major League Baseball organization.

- Rewrote the video search service to enable fast multi-faceted search, using schema design, query optimization, data pipeline management, benchmarking scripts and dark launches, behind a well-defined API.
- Launched data services for a biomechanics dashboard featuring aggregated team metrics, rolling calculations, and 3D time-series data, contributing across data modeling, schema design, and performance optimization.

Pear Therapeutics, New York, NY - Senior Software Engineer, 2022

Medical apps for treating substance use disorder. (Role ended due to company closure.)

Google, New York, NY - Software Engineer, 2014 - 2021

Google's music services: Google Play Music and YouTube Music.

- Shipped user-facing features across Google Play Music and YouTube Music via server-driven UI, owning each end-to-end from schema and API design through client integration and launch.
- Launched interstitial advertising in the web client, integrating non-deterministic ad and playback APIs into a complex consumer app to enable an ad-supported free tier.

Songza, New York, NY - Software Engineer, 2012 - 2014

Music startup pioneering curated and algorithmic playlists. Acquired by Google.

Eleven Learning, Cambridge, MA - Co-founder & CTO, 2009-2012

Educational publishing startup. Joined *Imagine K12* startup accelerator inaugural cohort.

EDUCATION

Harvard University, Cambridge, MA - B.A., Computer Science

SKILLS

Languages: Python, TypeScript, JavaScript, Ruby, SQL

Frameworks: FastAPI, React, Node.js, Express, NestJS, Rails, Django

Data Engineering: Postgres, MongoDB, DynamoDB, Pinecone, BigQuery, Airflow

Ops: GCP, AWS, SQS, Grafana, Docker
