
Dev Purkayastha

Software Engineer

20 years building software at Google, MLB, and mission-driven startups. Harvard CS.

New York City ♦ 617-642-4766 ♦ dev.purkayastha@gmail.com

EXPERIENCE

Two Things LLC, New York, NY - *Senior Software Engineer, 2025 - Current*

Platform engineering for *Good Inside*, a learning and support platform for parents and caregivers.

- Designed and shipped a proactive AI follow-up system for the LLM coaching chatbot, integrating Braze push notifications across backend services with scheduled automation to automatically re-engage users after completing content.
- Shipped a CMS-to-vector-store ingestion pipeline over SQS and Pinecone, enabling published content to be immediately available for RAG-based AI coaching features.
- Created and packaged an internal library for feature flags and experiments for use across different microservices to ensure a data-driven and consistent user experience.
- Designed a composable and extensible REST API endpoint for a recommendations service, flexibly serving different UI needs without a need for custom architecture.

New York Mets, New York, NY - *Senior Software Engineer, 2023 - 2025*

Internal platforms and tools for data analysis, decision-making and unique workflows, powering a Major League Baseball organization.

- Rewrote the video search service to enable fast multi-faceted search, using schema design, query optimization, data pipeline management, benchmarking scripts and dark launches, behind a well-defined API.
- Launched data services for a biomechanics dashboard featuring aggregated team metrics, rolling calculations, and 3D time-series data, contributing across data modelling, schema design, and performance optimization.

EXPERIENCE (cont'd)

Pear Therapeutics, New York, NY - *Senior Software Engineer, 2022*

Medical apps for treating substance use disorder and insomnia.

(Role ended due to company closure.)

- Developed backend microservices and libraries, as part of a migration from a legacy monolith backend.

Google, New York, NY - *Software Engineer, 2014 - 2021*

Google's music services: Google Play Music and YouTube Music.

(Joined via acquisition of Songza, a music startup.)

- Developed server-driven UI components through initial design, API development, client integration, and the launch process, resulting in measurable increase in app usage.
- Launched interstitial advertising in the web music client, integrating a complex app with non-deterministic APIs for ads and music. This enabled an ad-supported free tier, and resulted in increased usage and revenue.

Eleven Learning, Cambridge, MA - *Co-founder & CTO, 2009-2012*

Educational publishing startup for open-source digital textbooks.

Joined the inaugural cohort of Imagine K12 startup accelerator.

EDUCATION

Harvard University, Cambridge, MA

B.A., Computer Science

SKILLS

Languages: Python, TypeScript, JavaScript, Ruby, SQL

AI/ML Systems: LLM integration, agentic tooling, ML pipelines

Web Frameworks: FastAPI, React, Node.js, Express, NestJS, Rails, Django

Databases: Postgres, MongoDB, DynamoDB

Data Engineering: BigQuery, Airflow, Composer

Ops: GCP, AWS, SQS, Grafana, Docker
